

# یکسان سازی Author ID محققین با اسامی مختلف در Scopus

مسعود محمدی

عضو هیات علمی دانشگاه علوم پزشکی گلستان

- یکی از مشکلات محققین در گردآوری و ارزیابی آثار خود، وجود اسامی متفاوت نویسنده و شکل های متفاوت آن است که باعث مشکلاتی چون پراکندگی اطلاعاتی آثار نویسنده، پایین آمدن شاخص اچ آنها (H-Index)، تداخل در مراحل علم سنجی و مشکلاتی از این قبیل می شود. به همین دلیل یکدستی آثار محقق تحت یک نام مشخص از اهمیت به سزایی برخوردار است.

# مراحل کار:

۱ - وارد پایگاه اطلاعاتی Scopus شده و از طریق گزینه Author Search نام خود را جستجو کنید.

To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)
