To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. [About Scopus Author Identifier](#)

خروجی گرفتن از نتایج جستجو و ارسال آن به نرم افزارهای رفرنس نویسی یا اکسل

- اگر شما از نرم افزارهای رفرنس نویسی مانند Endnote برای تالیف کارهای پژوهشی خود استفاده می کنید ، می توانید مشخصات کتابشناختی منابعی که در اسکوپوس مورد استفاده قرار داده اید را مستقیماً به نرم افزارهای رفرنس نویسی و یا حتی به یک فایل اکسل ارسال کنید.

- مراحل کار را ببینید:

پس از انجام جستجوی دلخواه خود، هر کدام از منابعی را مورد استفاده قرار داده اید انتخاب کرده و سپس از طریق گزینه RIS export اطلاعات کتابشناختی آن منبع را در نرم افزار مطلوب خود وارد کنید.

Your default export has been saved in your settings. This setting will be used in all of your exports.
